

Minnesota Criminal History System RFP

Vendor Day January 30, 2014

Welcome

Jerry Olson Sr. Project Manager

Agenda

See handout for detailed agenda

- Welcome
- Important Information for Responders
- Overview
- Business Perspective
- RFP Highlights
- Other Information

Ground Rules

- We will provide supplemental information.
- We do not expect to answer all questions you may have.
- Nothing said or presented here today modifies the RFP.
- Verbal responses are non-binding.
- No RFP conversations with State staff.
- We will have a hard-stop at 5:00pm.

Questions

- Questions submitted in writing will be included in formal responses.
- To submit a question:
 - □ Email to:
 - maureen.janke@state.mn.us
 - □ Hand it to BCA staff member
 - Don't use the online Chat function

- Restrooms located on this floor stay right, past elevator
- Coffee in the lobby is for classes. Our coffee and treats are in this room
- Lunch
- This PowerPoint deck is posted on BCA web site: http://bit.ly/MvOsT2

https://dps.mn.gov/divisions/bca/bca-divisions/mnjis/Pages/information-for-vendors.aspx

Information for Responders

Maureen Janke
Grants & Contracts Manager

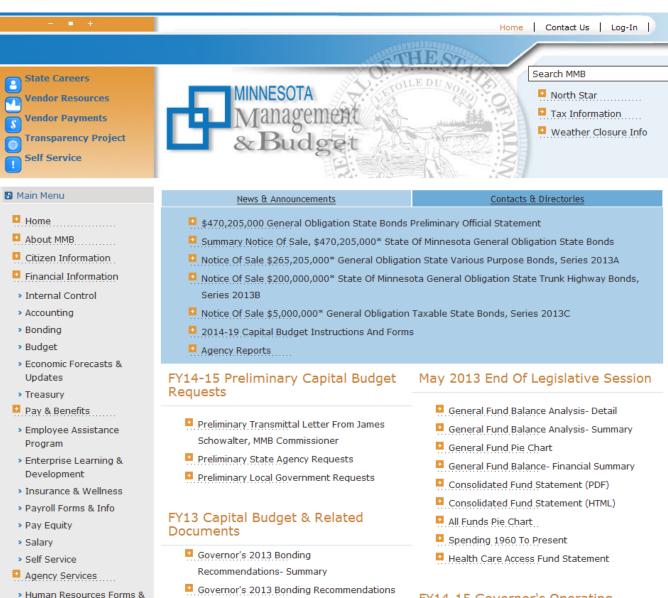

Topics

- SWIFT Information
- RFP Deadlines

Supplier Portal Announcements

Vendors with questions about responding to a specific event, solicitation, bid or proposal opportunity or needing to register in the supplier portal so they can bid on an event, may contact the MN Dept. of Administration, Materials Management Division at 651/201-8100, option 1. Then follow the prompts to connect you to the correct contact person.

01/02/13: 2013 Changes for Minnesota Vendors. Several changes are being implemented for vendors utilizing the Supplier Portal. To view these changes go to: http://www.swift.state.mn.us/doc/messages/announce-12-31-12.pdf

If your password has expired, please click on the Change Password link located under the message in red. Do not use the I forgot my password link, this will not reset your password.

If you are a returning Vendor and you do not have a User ID then be sure to obtain a User ID by clicking Vendor Registration link located in the Login section. Be sure to provide your Vendor Name, TIN Type and your Federal ID number or SSN!

If you are having issues when attempting to view attachments, check to see if your Pop-Up Blocker is turned on. Pop-Up Blocker must be off in order to view attachments.

Users who are using the Safari or IE9 internet browsers have experienced problems when attempting to Register.

If you experience a problem trying to view a page or any data, please clear your browser cache.

Events

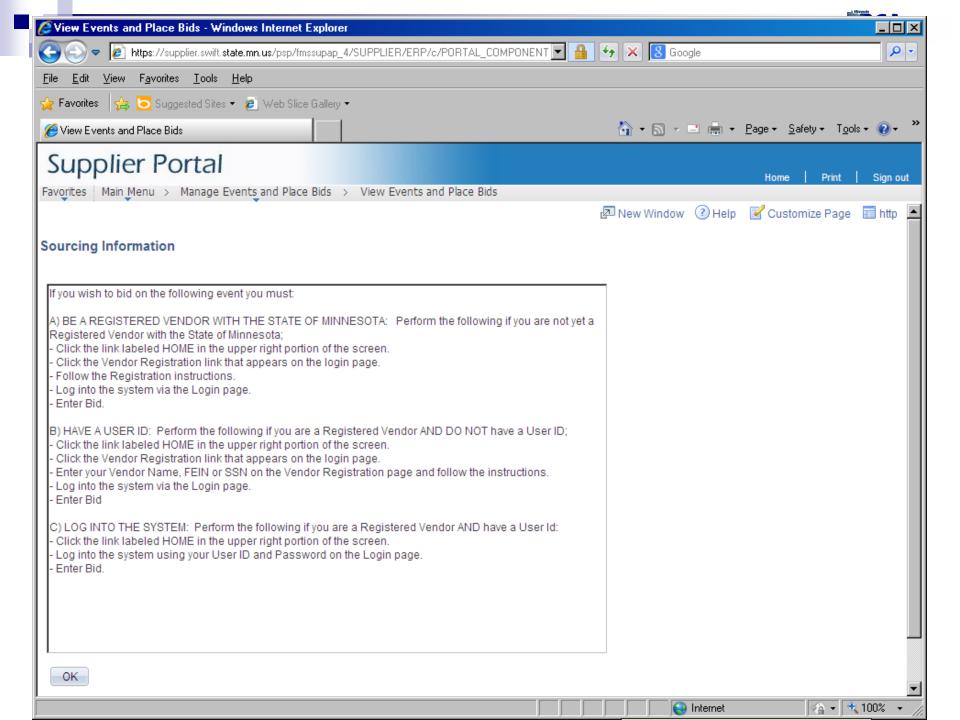

YOU MUST BE REGISTERED as a vendor to participate in these events or to receive notice of any addenda issued.

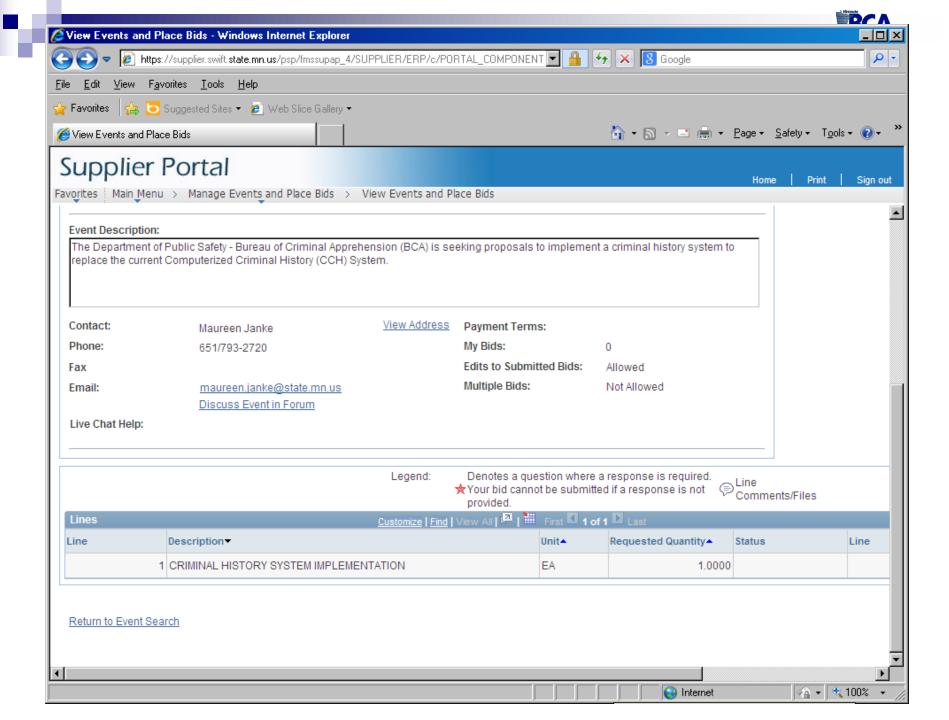

Solicitations

NOTICE - This is not the official announcements page. Not all solicitations are provided. Click here for a current listing of solicitation announcements.

Where We Are in the Process

- Get in and register
 - Download the full RFP
 - Complete any of the required General Information and SAVE
- Attend the Vendor Day
 - ☐ Ask Questions

RFP Deadlines

- Questions Due <u>February 3, 2014 by 2:00PM CT</u>
- Prospective responders who have any questions regarding this request for proposal may contact: Maureen Janke, Contracts Manager <u>maureen.janke@state.mn.us</u>
- Answers posted in SWIFT by February 6, 2014 4:00PM
- Final Questions Due <u>February 12, 2014 by 2:00PM CT</u>
- Answers posted in SWIFT by February 19, 2014 4:00PM

PROPOSAL DUE DATE

- PROPOSALS DUE
 - □ MARCH 17, 2014 2PM CT
 - ☐ SWIFT will close
- Evaluation and selection planned to complete by May 16, 2014

RFP Overview & Evaluation Process

Jerry Olson Sr. Project Manager

- RFP Exhibit Overview
- Response Content
- Cross Reference Matrix
- Evaluation Process
 - Technical
 - □ Cost

RFP Exhibit Overview

- 7 Exhibits Basis for contract
 - ☐ A: SOW
 - ☐ B: BRS
 - C: SRS
 - □ D: Data Conversion
 - □ E: Records & Throughput
 - □ F: Glossary
 - □ G: Cross Reference Matrix

Response Content

- Present your solution in its best light.
- Identify the response items we require.
- Missing information may disqualify you or affect points during the evaluation.
- Identify staff with criminal history experience that will work on this project.
- Be clear, concise and thorough, but more is not always better.

- This is a key document for you and us.
- For you:
 - Requirements priority
 - Communicate requirements comments
- For us:
 - Shows if you will provide what we want
 - Where each requirement is described
- Don't repeat your response in comments.

- Must Submit in MS Excel format
- Include your "Self Rating" based on the options listed.
 - □ No math performed on this column
 - □ We will verify

		Vendor Self Rating		
ID	Process Area / Requirement	{Vendor Name}	>	
			Priority	RFP Response Page
	Application Software Fit			Number

- Requirements "Priority"
 - □ This RFP describes the system desired.
 - □ We expect "High Priority" requirements.
 - Some requirements are improvements or features we want.

		Vendor Self Rating	
ID	Process Area / Requirement	{Vendor Name}	ity
			RFP Response
	Application Software Fit		Page Number Reference

RFP Response Page Number will help us locate supporting information for specific requirements within your response.

		Vendor Self Rating	
ID	Process Area / Requirement	{Vendor Name}	RFP Response
	Application Software Fit		Page Number Reference

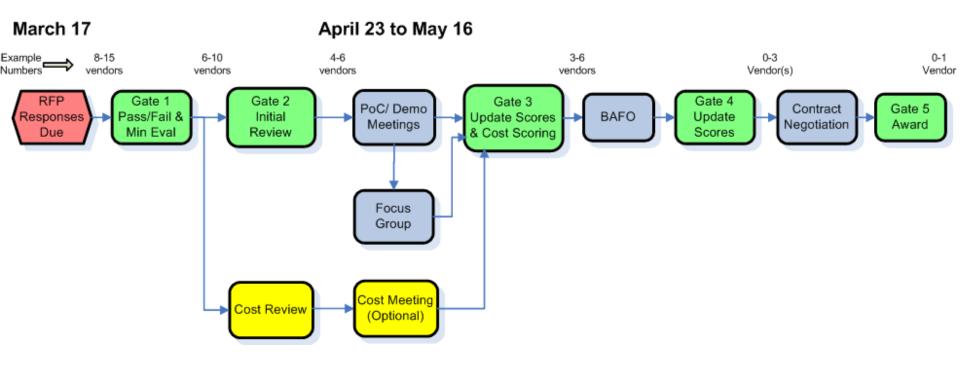

Evaluation Process

- Objective: Select the best overall solution.
- Multi-gate process intended to progressively filter responses.
- Process will include meetings with the top responders that may include:
 - Presentations
 - □ Proof of Concept/Demos
 - □ Focus Group Evaluation

Evaluation Process

- The scoring process is designed to evaluate a range from COTS to custom solutions and identify the best solution.
- The scoring focus is different at each gate.

Cost Evaluation

- Separate evaluation team.
- Based on "Total Cost of Ownership"
 - What we are buying from you
 - What we must buy (hardware & software)
 - Resources the State must provide; employee, contract staff, space, other purchases
 - Maintenance costs
 - Other costs

Cost Evaluation

- Identify the cost of the minimum we must buy to meet our requirements.
- Including costs for features we did not ask for may not help you.
- Make it possible for us to compare.

Glossary Highlights

Jennifer Battan, CBAP® Sr. Business Analyst

Minnesota Specific Terms

- Suspense
- Hold

Seal

Expunge

Minnesota Specific Terms

- Predatory Offender Registry
- Methamphetamine Offender Registry

- Questioned Identity
- Challenge
- Statement of Disagreement

Minnesota Specific Terms

BioID

Civil Applicant Processing System (CAPS)

Minnesota Specific Terms

- Controlling Agency (CAG)
- National Fingerprint File (NFF)

Business Perspective

Wendy Gray
Criminal History Supervisor

Julie LeTourneau Lackner Biometrics & CH Business Manager

Topics

- Business Perspective for a new system
- Opportunities for improvement
- Key Improvement Drivers & Goals
 - □ Reduce manual processes
 - □ Ease of use
 - Record quality
 - Management tools
 - Service to customers

Business Perspective

- Old System, Old Technology
 - Difficult to modify/integrate
 - MNCIS
 - Point of sale software
 - SWIFT
 - Future applications
 - Difficult to find resources to maintain it
- Consolidate multiple applications

Business Perspective

- Today
 - Nationally recognized leaders
 - National Fingerprint File participant
- Future
 - Complex rules need to be preserved
 - Current automation must be retained
 - FBI synchronization
- We're looking for a forward thinking solution providing flexibility for the future.

Reduce Manual Processes

- Streamlining processes
- Integration of document management
- Automated workflow manager
 - Minimize handling paper
 - Moving from person to person
 - Work from scanned documents
 - □ Automating task creation and assignment

Improve Ease of Use

- Users currently use notes, multiple instances of the application, and compare from partner systems.
- User Interface
 - Straightforward intuitive
 - Consolidate different applications/interfaces
- User documentation for ease of training necessary staff.

Improve Ease of Use

- Reduce reliance on technical staff for business changes
 - Adding/modifying codes
 - Modifying dissemination rules

Improve Record Quality

- Reduce suspense
 - Implement matching processes
 - Other ideas
- Looking to vendor for new perspectives.
- Shift focus from data entry to data quality.
- Agency access to maintain records, but enforce rules for what agencies are allowed to change and when.

Improve Record Quality

- Moving to one SID per person
 - Automation of processes
 - Aligns with direction of FBI and AFIS
- Consistent application of dissemination & retention rules
 - Within the system
 - As data is disseminated

Improve Management Tools

- Business management/monitoring
 - Audit capabilities
- Getting information out of the system
 - Ad hoc reporting
 - Reduce dependency on development staff

Improve Service to Customers

- Easier to read criminal history record
- Background checks
 - Electronic requests
 - Electronic dissemination
- Ready for new services and volumes
 - Increased background check volume
 - □ RAP Back

Architecture Overview

Dave Everson SOA Architect

Mark Girard
Middleware Architect

Topics

- Current CHH Architecture
- MNJIS Strategic Goals
- MNJIS Architecture Drivers, Goals & Principles
- SOA Reference Architecture
- NIEM
- Person Identity Management
- MNJIS Current Infrastructure

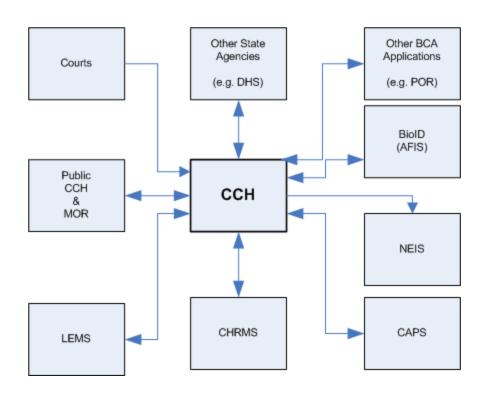

Architecture Purpose

- To provide a decision framework, in the context of the business strategy, for the use of technology in the enterprise.
- The architecture is responsible for defining how technology will be used to support the business strategy and benefit the business.

Current CCH Architecture

- DEC/HP/Compaq Alpha Cluster
- Oracle Rdb 7.0-12
- BEA MessageQ
- Apache XML Parser
- COBOL, PL/I, C++
- Open VMS V7.3-1

MNJIS Strategic Goals

- Enable the Mission through Information Sharing
- Enable the Mission by Providing Services for our Customers
- Support Effective and Efficient Use of MNJIS Resources
- Provide Resilient and Secure Infrastructure
- Leverage Common Administrative Solutions

MNJIS Architecture Drivers

- State Legislature
- Federal Policy
- Governor's Office
- Commissioner's Office
- Policy Group / Task Force
- Customers: Both Public & Internal
- State Policies / Rules

MNJIS Architecture Goals

- Business & IT Alignment
- Align Costs to Meet Business Needs
- Architecture Standardization
- Allow for Flexibility/Configuration for Changing Business Requirements
- Increase Software Engineering Productivity
- Improve Overall Quality
- Asset Management

MNJIS Architectural Principles

- Information is a BCA Asset
- Data and Information Stewardship
- Integration & Interoperability
- Reuse Before We Buy & Buy Before We Build Internally
- Ensure Security, Confidentiality & Privacy
- Continuity of Operations Planning

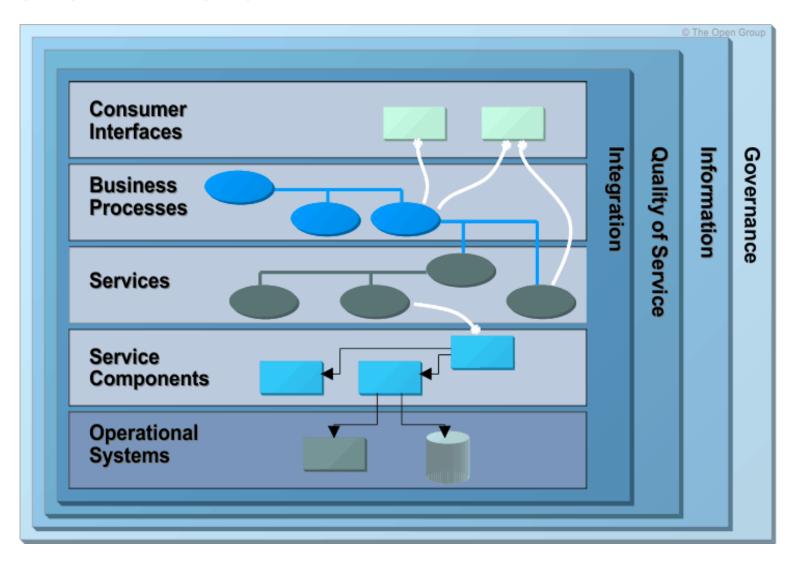

M

MNJIS Architectural Principles

- Enterprise Network as "Virtual" LAN
- Information Access
- Reengineer First
- Total Cost of Ownership
- Mainstream Technologies
- Industry Standards
- Architectural Management

TOGAF SOA Reference Model

NIEM 3.0

- Preferred Information Sharing Standard
- Required for External BCA Exchanges
- Leverage ESB to translate between Proprietary XML and NIEM 3.0

Person Identity Management

- Strong Preference for CHS to Integrate/Support a Standalone Person Identity Management System
- To foster better reuse and minimize redundancy between MNJIS systems

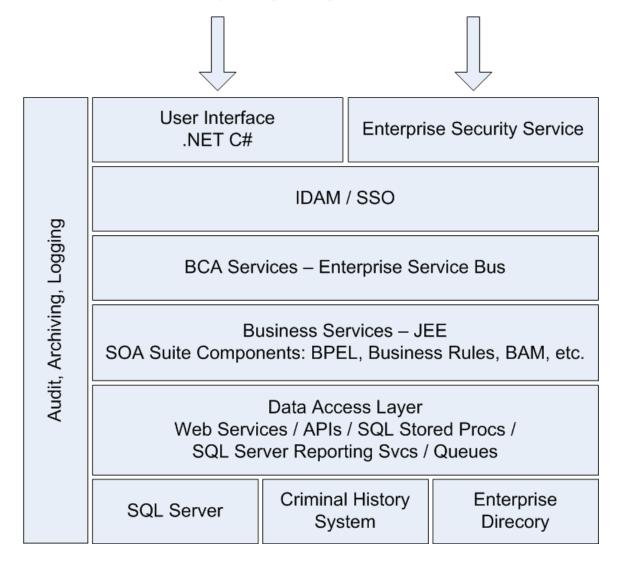

MNJIS Development Languages

- Client
 - User Interfaces
 - □ .NET C# MVC 4.0
 - Deploy to IIS
- Server
 - □ Web Services, SOA/BPEL Components
 - □ EJB Business Logic
 - □ JEE 6.0
 - □ Deploy to WebLogic 10.3.6

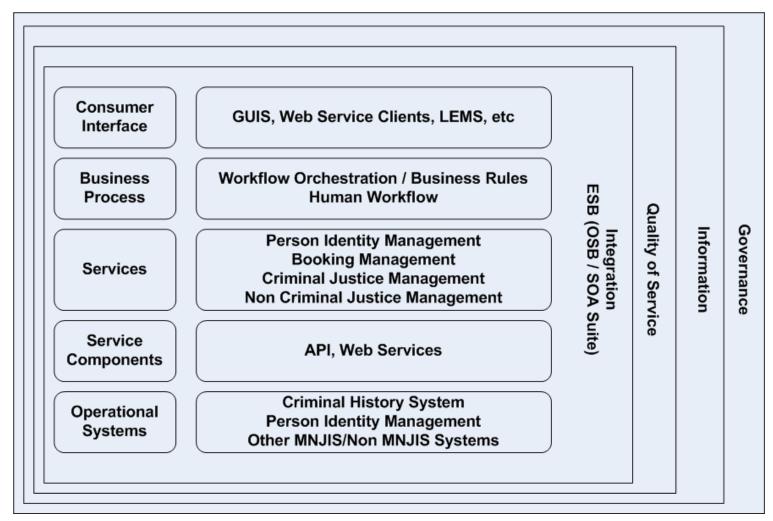

Current MNJIS Service Pattern

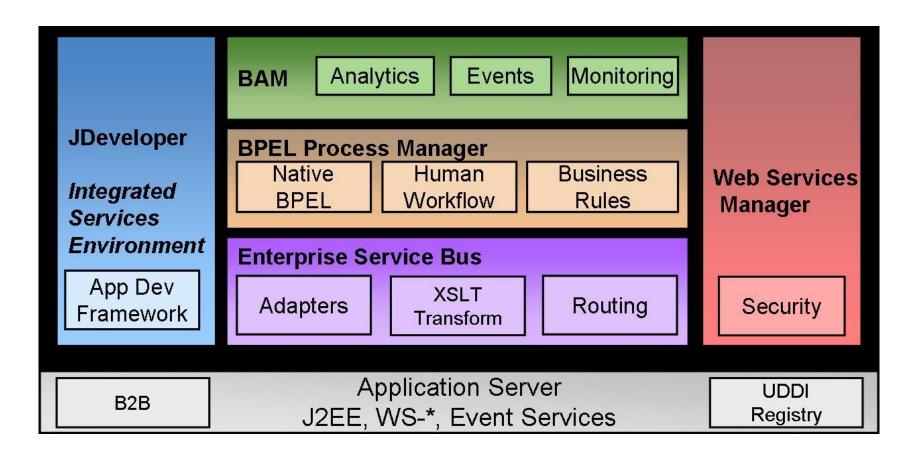

Layering CHS on SOA RM

Lunch Break

Future State Overview

Luther (Ed) Cutchins Sr. Business Analyst

Topics

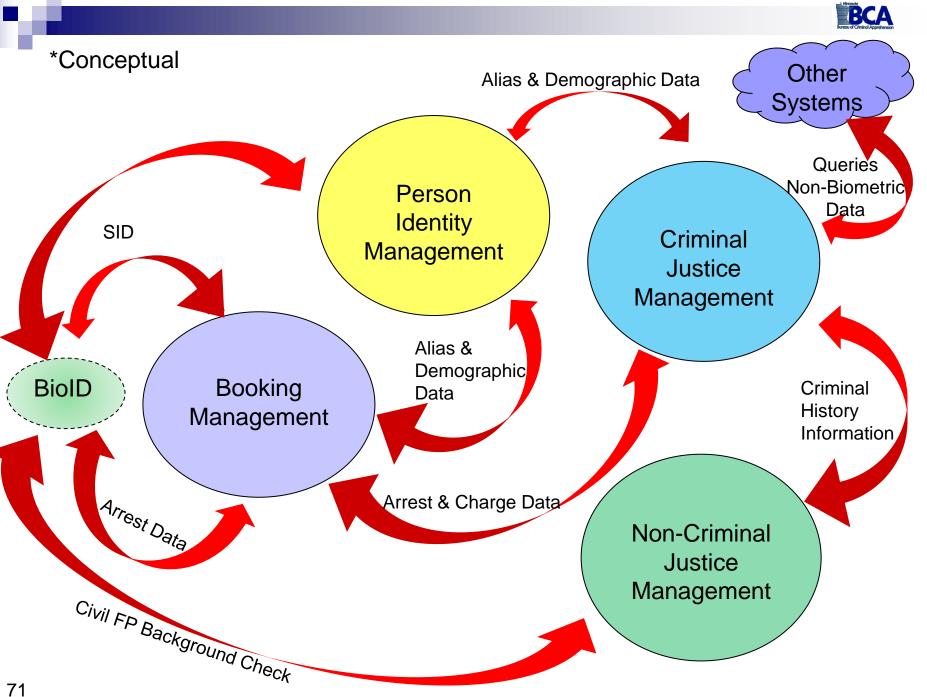

- Introduction to Capabilities
- Conceptual view of the system

Introduction to CHS Capabilities

- Four Core Capabilities
 - □ Booking Management
 - □ Person Identity Management
 - Criminal Justice Management
 - □ Non-Criminal Justice Management

Capabilities & Requirements Overview

Jennifer Battan, CBAP® Sr. Business Analyst

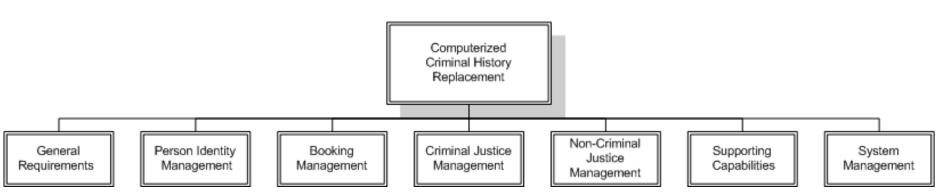

- Requirements approach
- Overview of requirements by capability
- Next steps for requirements

Requirements Overview

The BRS is structured using the capabilities, with additional sections added for clarification or requirements which apply to multiple capabilities.

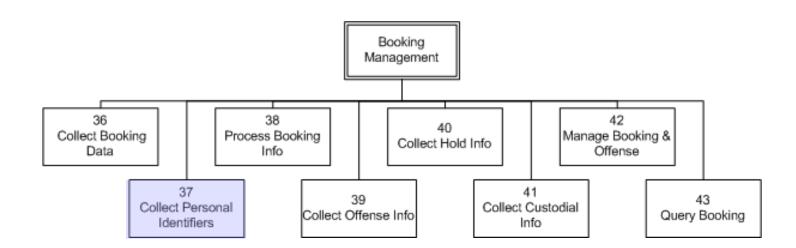

- Event based system based on biometric identification.
 - □ 100% confidence that the person being identified is the actual person.

- One system to support:
 - □ Juvenile Delinquent & Adult Criminal records.
 - □ Criminal & Civil background check processes.

Booking Management

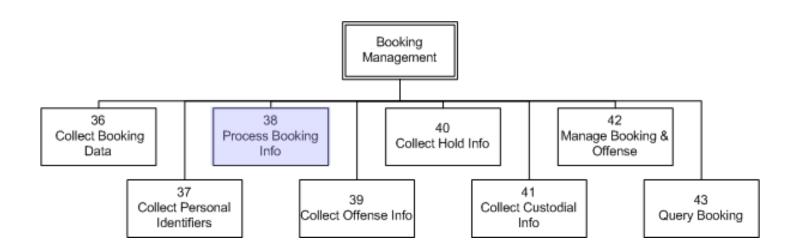

Maintain Alias and Demographic information with the event.

Booking Management

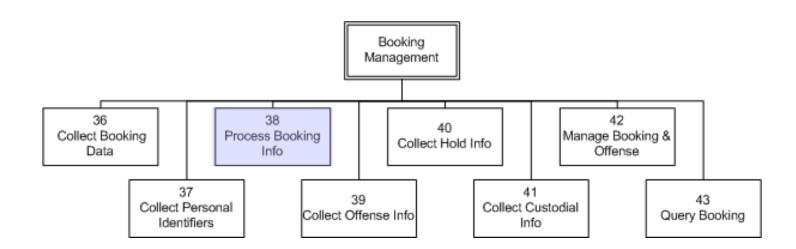

- Identify events as Adult or Juvenile
- Allowing the distinction to be changed

Booking Management

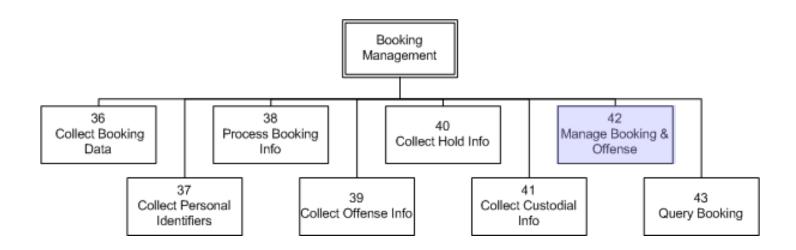

- Handle booking event complexities
 - Multiple booking types in one event
 - Identify and prevent possible duplicate bookings when corrections are sent

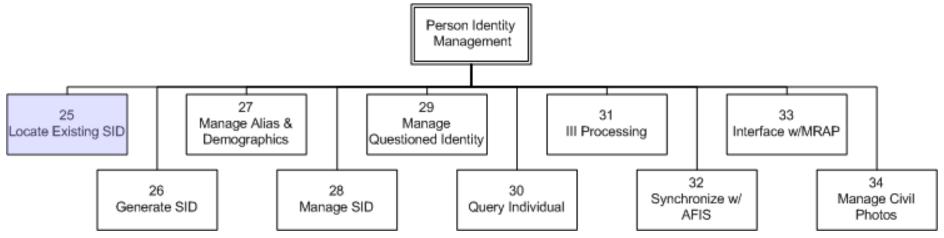

- User interface to allow agencies to update booking information and resolve duplications
- Enforce update rules

Person Identity Management

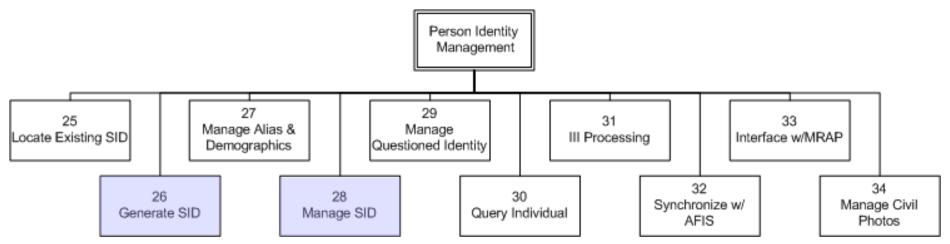

- High desire for this capability to stand alone for reusability within other systems.
- Indicate the type of biometric on file
 - □ Fingerprints at implementation

Person Identity Management

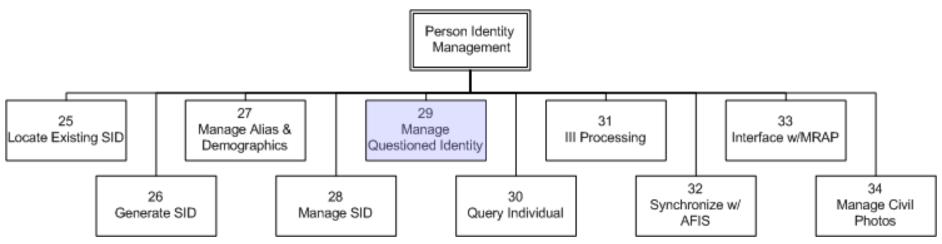

- Moving to a single SID with identifiers for event types
- Generate, Validate & Assign SID
 - Manage SID info, view SID history

Person Identity Management

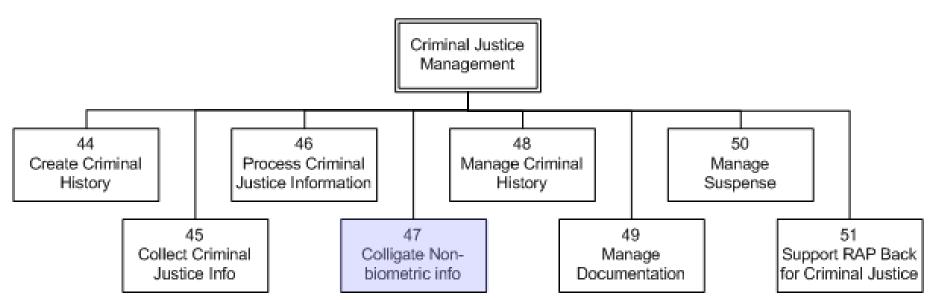

- Manage Questioned Identity documents
 - □ Generate letters with validation number
 - Public access to validation number authentication

Criminal Justice Management

Colligation of non-biometric information is a key task the new system must provide.

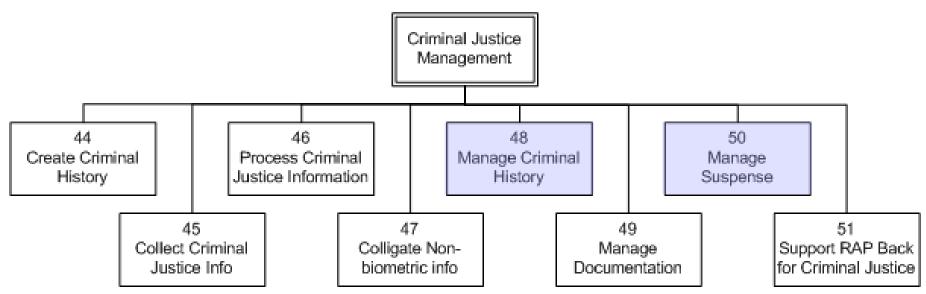

Criminal Justice Management

- Allow access to agencies to manage events, including suspense.
- Manage, research and resolve suspense.

Non-Criminal Justice Management

- End to end background check processing for civil background checks
 - Manage Informed Consent
 - □ Real-time background check processing

Non-Criminal Justice Management

- Provide a secure web interface for:
 - Background check requests
 - Delivery of background check results
 - □ Background check status requests & updates

Non-Criminal Justice Management

- Accounting services for all background check processes
 - Managements of accounts
 - □ Accept payments
 - □ Account reconciliation

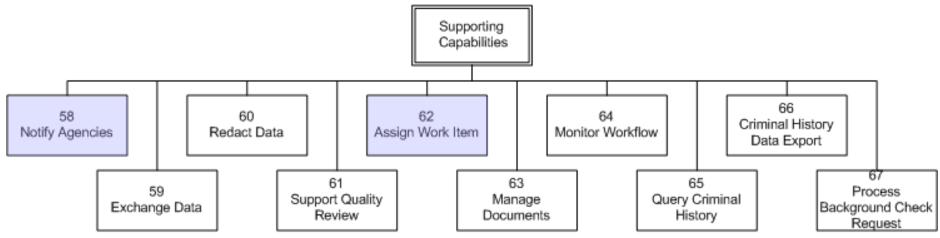

- Support RAP Back for both Criminal Justice and Non-Criminal Justice purposes.
 - □ Interface with and use of the FBI's NGI Rap Back Services
 - Minnesota only RAP Back
- Identity Protection & Verification

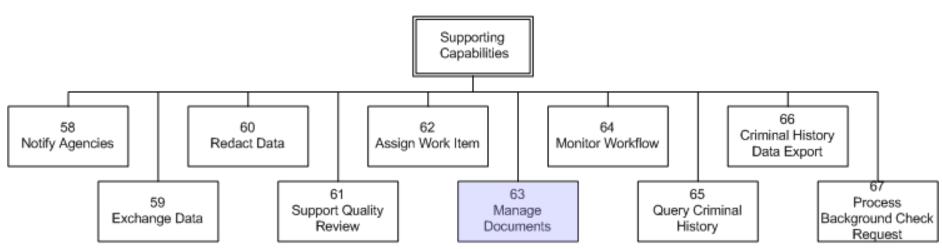

- Generate and deliver notifications to criminal justice agencies.
- Create and assign tasks to analysts, monitor workflow, provide reporting.

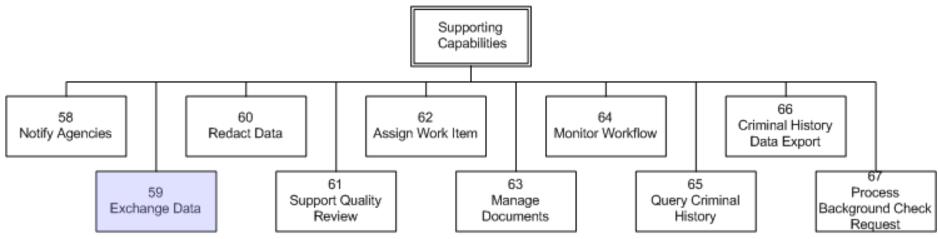

- Streamlining document management
 - □ Reduce dual work efforts
 - □ Improve access to documents from records

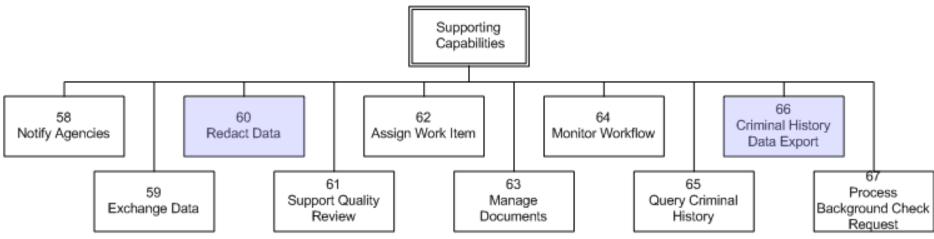

- Exchange data with select criminal justice systems.
 - Minnesota specific or internal systems
 - □ Systems external to Minnesota

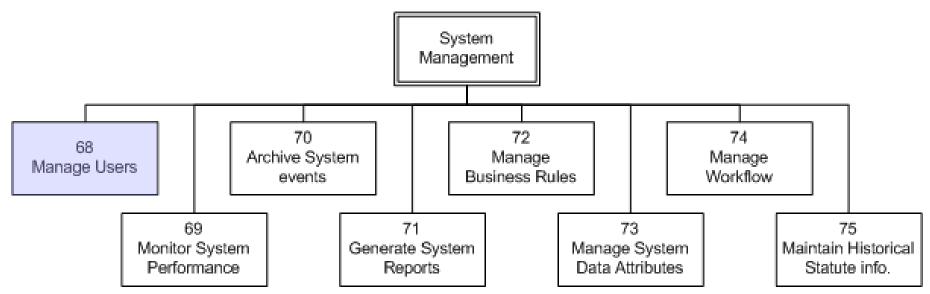

- Apply redaction rules both within the system and as data is disseminated.
- Deliver ad hoc data extract requests or reports in hard copy or electronic formats.

System Management

Enable user management, including access and authorization for internal and external users.

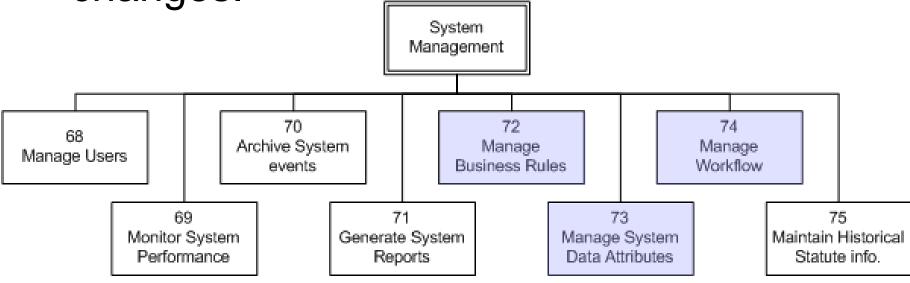

System Management

Enable management of business rules, workflow changes, and data attributes to quickly adapt to legislation or business changes.

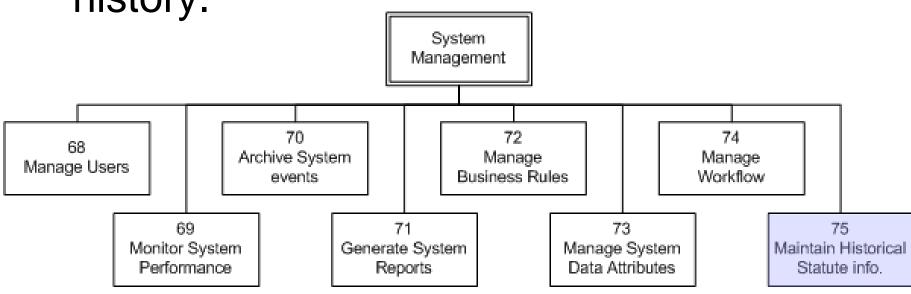

System Management

In addition to utilizing a shared Minnesota Statute Service, the system maintains historical statutes which impact criminal history.

Use Cases & Additional Detail

- The functionality of the desired system is well understood.
- We're not going to work into further detail yet, as we don't want to taint the RFP responses or the evaluation process.

Data Conversion

Luther (Ed) Cutchins Sr. Business Analyst

- Assumptions/Questions
- Constraints
- Data Conversion Specifications
- Comparison Reports
- Document Conversion
- Catapult POS

М

Assumptions/Questions

- Single SID
 - Juvenile SID's associated with Adult SID
 - Juvenile SID's not associated with Adult SID
 - ☐ XML file for consumption by other systems
- Sealed Data
 - □ Data currently marked as sealed must maintain its status

Assumptions/Questions

- Data Errors
 - □ Identify where error came from
 - □ Document the error
 - Discuss resolution with BCA staff
- Court Interface
 - Currently system designed using TCIS
 - □ Courts have migrated to MNCIS
 - □ BCA has created documentation around this conversion item

Constraints

- Lack of Timestamps in current system
- Conversion must cause minimal impact
- BCA staff will be available
- Current system will be available for queries

Data Conversion Specifications

- Data Dictionary
- Schema Specifications
 - □ CCH
 - CAPS
- ERD

 - CAPS

Comparison Reports

- Compilation of Sample Reports
 - Reports will be executed against the new and old systems
 - Designed to provide at a glance comparisons

Document Conversion

- Two possibilities
 - □ Option 1 New system includes document management
 - Must convert existing documents to new system
 - Option 2 New system interfaces with Info Image
 - Must provide seamless integration to facilitate viewing of documents in the application

Catapult POS

- Explore possibilities of expanding use of Catapult for accounting functions
- Currently maintained in CCH

Supplemental Documentation

Luther (Ed) Cutchins Sr. Business Analyst

- Business Process Documents
- Models and Diagrams
- RAP Sheet
- Miscellaneous Documents

Business Process Documents

- 15 Manual Processes Identified and Documented Such as;
 - □ Mail Sort & Work Assignment
 - □ Petition responses
 - □ Court Orders
 - □ Juvenile Diversions
 - Discharges
 - Manual Logs

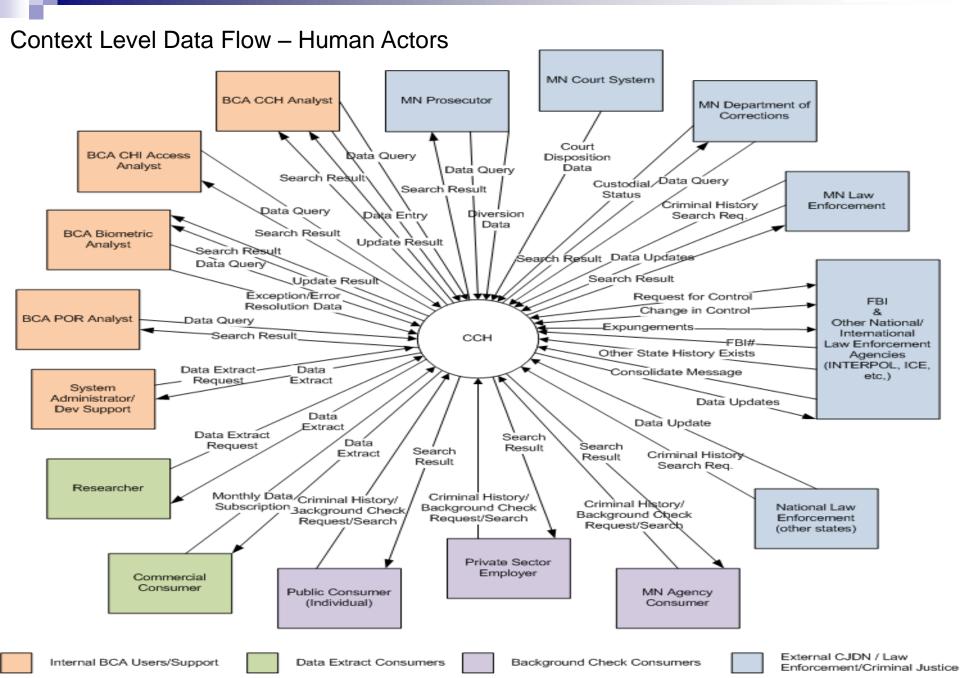

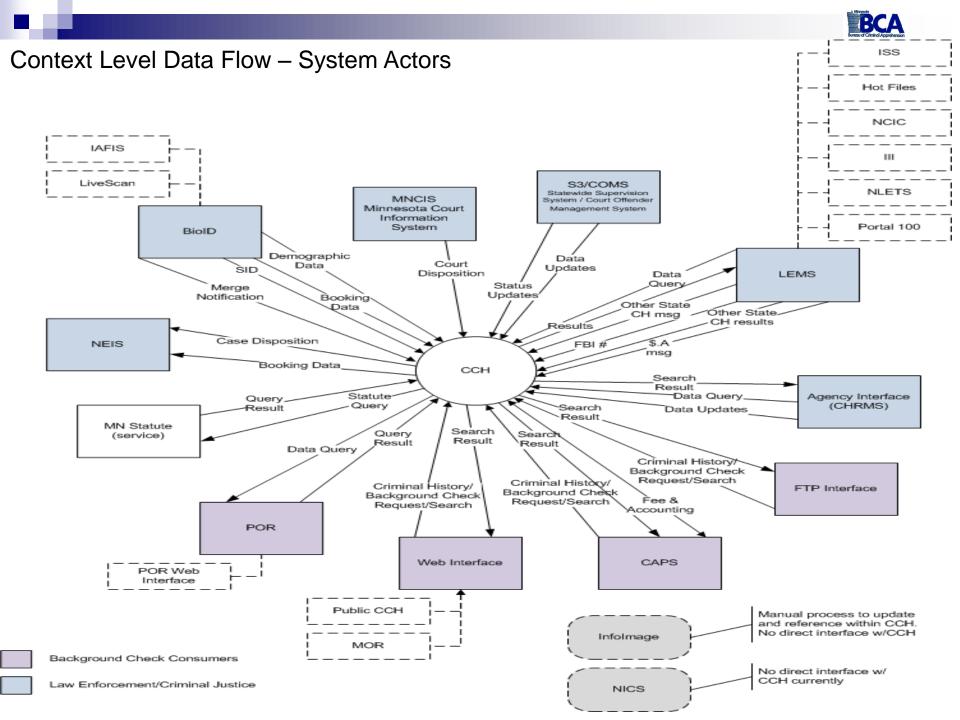

Models and Diagrams

- As-Is Context Diagrams
- Class Diagrams
- Sequence Diagrams
- Activity Diagrams
- Future State Functional Decomposition

RAP Sheet

- Worked started during MNCIS CCH Project
- Some Considerations
 - Changing from portrait to landscape
 - Use of watermark
 - □ Use of borders to group data
 - Standardized header and footer

Quality Assurance

Jerry Olson Sr. Project Manager

Topics

- QA Principles
- Testing
- Accessibility

Principles

- Acceptance of each deliverable is dependent on meeting its requirements
- BCA has distinct operational environments with progressive restrictions.
- Vendors must comply with BCA Change Management procedures

Testing

- We expect our vendors to thoroughly test their system(s) before presenting it to us
- BCA will validate vendor testing
 - witness/audit vendor testing
 - conduct our own tests
- Test data will be a challenge
- Will need to build a "sanitized" database

Testing

- Tests must map to requirements and all requirements should be tested
 - Functional
 - Non Functional
- If Parallel operation is proposed, it must be manageable and not prevent staff from completing "real" work

Testing

- Testing automation should be maximized and be the basis for regression tests
 - BCA currently uses HP LoadRunner
- User Acceptance is a key step
- Accessibility is required

Accessibility

- Non-Compliance is a liability for State
- Applies to all documents
 - Accessible templates are helpful
 - Verification requirements are in the SOW
- Applies to user interfaces
- Applies to system generated reports displayed in UI

Accessibility

- Existing User Interfaces do not have to be redesigned
 - Accessibility is a scoring factor
 - A path to accessibility is desired
- Must be included in testing
- State may perform additional testing
- Today's automated tests are inadequate

Maintenance

Jerry Olson Sr. Project Manager

Principles

- We want a smart way to manage the system
- Up-time and response time is critical
- Bugs that affect quality must be fixed ASAP
- We want the ability to continually enhance and improve

Outsource vs. Internal

- Both approaches have advantages and disadvantages
- Both have dependencies on vendor
- BCA has a role in both
- Total cost of ownership will take into account vendor costs and BCA staff costs

General Information

Jerry Olson Sr. Project Manager

Topics

- BCA/MNJIS and MN.IT
- Project Execution
- Misc. Info

About BCA MNJIS

- BCA divisions; Lab, Investigations, CJTE, MNJIS
- Majority of MNJIS staff is IT
 - □ 60% IT, 40% business
- Experienced at iterative/agile development
- We rely on our PMDLC methodology (Project Management – Development Life Cycle)
 - Where possible we will use PMDLC templates

About MN.IT

- Central IT for all State of MN
- "Virtual" IT organization
- All IT staff at BCA are part of MN.IT.
- Staff designated as MN.IT@BCA/MNJIS
- Funding/contract is thru MN.IT@Central

Project Execution

- Work as partners
- Jointly plan
- What can we do to:
 - □ Reduce risk
 - Improve communication
 - □ Work smart
 - □ Deliver a great product

Miscellaneous

- Data practices
 - Restrictions on non-public data leaving State network
 - SharePoint (not secure for non-public data)
- Working on site at MNJIS
 - Expect custom development on-site
 - If BCA will get source code, we want to be part of the development team
- Background Checks required

Questions?

Thank you!
